

# WORK SMARTER.

Managing a feedlot is no small feat—especially when you’re juggling long hours, employee turnover, maximizing cattle performance and controlling costs.

**Imagine cutting through the noise to streamline operations, reduce stress, and unlock hidden revenue.**

Fusion takes the guesswork out of feedlot management, empowering you to run a more profitable, efficient, and sustainable operation.

## SEAMLESS TRANSITION, COMPLETE CONFIDENCE.

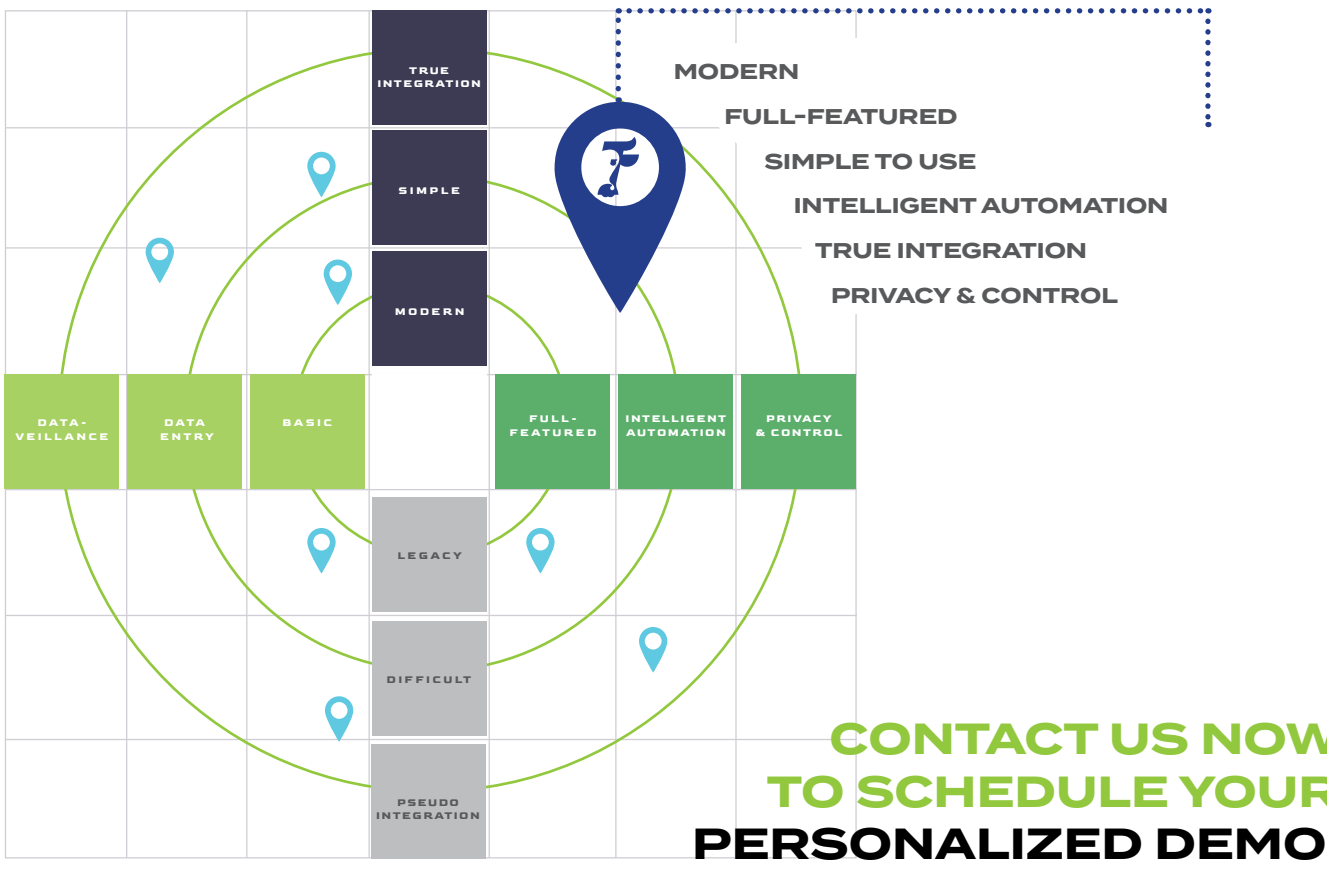

Experience a seamless transition from day one with our customized onboarding process. We support you every step of the way:

- 1. Assessment Call**  
A free 30-minute call where we learn about your specific yard and processes.
- 2. Customized Onboarding Plan**  
We develop a detailed plan designed to ensure a smooth transition for your specific situation.
- 3. Transition Day**  
We guarantee that Fusion will function successfully and that your employees will be comfortable with it on transition day.

# STOP CHASING YOUR TAIL.

**LEVERAGE FUSION’S MARKET METRICS FOR PERFORMANCE AND PROFITABILITY.**

Looking for feedlot software that meets all your needs? This chart demonstrates how Fusion stands out among the rest. We are the only solution that delivers on **all six key features**, giving you the complete package for smarter, more efficient management.

**Save time, maximize efficiency, boost profits, and watch your investment pay off.**

# UNLOCK MAXIMUM ROI.

Achieve remarkable returns with our software—averaging a **1796% ROI** in just one year. Scan the QR for a detailed cost breakdown and start maximizing your profits today!

- + Actual Quantity–Based Billing**  
**ROI** – eliminate overages
- + Optimized Bunk Management**  
**ROI** – reduce waste through precise feeding histories and protocols
- + Custom Defined Protocols for Growing and Finishing Diets**  
**ROI**– save money with a streamlined custom feeding schedule
- + Sorting Cattle into Uniform Marketing Groups**  
**ROI** – automated, data-driven sorting improves accuracy and optimizes returns at a micro level
- + Tightly Monitored Inventories**  
**ROI** – minimize discrepancies between purchases & usage in cattle, commodities, and drugs
- + GPS–Monitored Feeding**  
**ROI** – eliminate incorrect feed delivery and record feeding details to uncover your optimal levels
- + Unwaivering Health Protocol Oversight**  
**ROI** – pen checkers apply vet-defined treatments, ensuring consistent, professional care

# POWER OPERATIONS WITH SMART AUTOMATION.

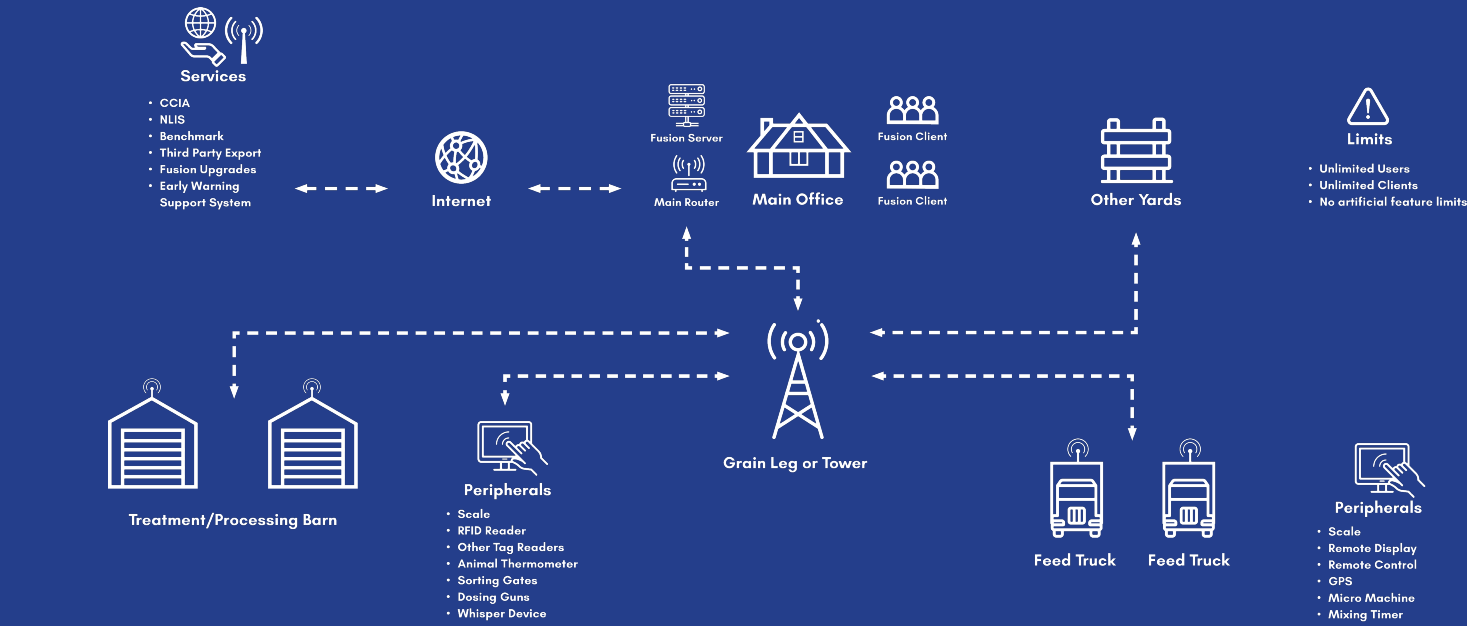

- Cut training time and boost ROI.** Since Fusion streamlines and automates data collection and tasks, your talent pool increases exponentially. Less need for specialized training.
- Maximize efficiency, “touch free.”** Fusion automatically captures data (from peripherals like tag readers, scales, and dosing guns) and performs calculations with precise instructions to help your team work faster. Minimal screen interaction needed.
- Simplify feeding with precise, automated scale adjustments.** Fusion enables accurate feeding by adjusting ration formulas and factoring in dry matter percentages. With just one press of a button, it records data automatically, saving time and reducing errors.

# TAKE CONTROL, WITH SECURE DATA.

Keep full control over your data, safely stored and privately secured on your own site.

# FUSION SYSTEM – AT A GLANCE.

“Before using Fusion our trucks had to be connected to Wi-Fi all the time. That’s no longer true with Fusion. Feeding cattle, even at a remote yard, has been simplified because we’re no longer interrupted because of an internet connection issue. This has been a game changer for us!

Jake Wolfinger, 4+ Feeders, LLC
